Abstract: Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the general provisions of 40 CFR Part 63, Subpart A, as well as the specific requirements at 40 CFR Part 63, Subpart AAAAAAA. This includes submitting initial notification reports, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/affected entities: Area source facilities that process asphalt or manufacture asphalt roofing products.

Respondent's obligation to respond: Mandatory (40 CFR Part 63, Subpart AAAAAAA).

Estimated number of respondents: 75 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 3,020 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$305,000 (per year), which includes \$1,130 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is a small adjustment increase in the respondent labor hours and the total O&M costs as currently identified in the OMB Inventory of Approved Burdens. The increase in labor hours is due to a change in assumption. In this ICR, we assume all existing sources will take some time each year to re-familiarize themselves with the regulatory requirements. The increase of five dollars in total O&M cost is due to rounding of all calculated values to three significant figures.
